IT RESILIENCE

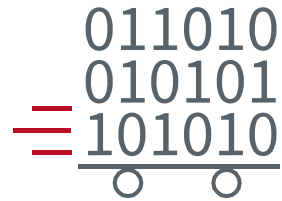

Protect | Transform | Innovate

Zerto IT Resilience Platform

Continuous
DR & Backup

No downtime,
no data loss

Workload
Mobility

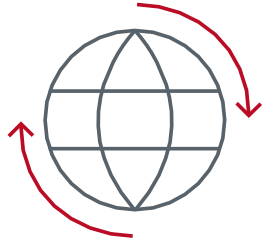

Move with ease
and without risk

Multi-Cloud,
Hybrid Cloud

Leverage cloud to
accelerate business

Protect, Transform & Innovate

Continuous DR & Backup

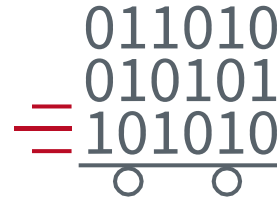

Outages & Disruptions

Ransomware Attacks

Complete Data Protection

Workload Mobility

Infrastructure Modernization

Consolidations & Migrations

Testing & DevOps

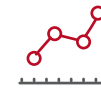

Multi-Cloud, Hybrid Cloud

Cloud Integration & Migration

Multi-Cloud Hybrid Cloud

Analytics Across Clouds

Outages & Disruption

Protect Your Brand from All Disruptions

- Continuous Data Protection for the lowest RTOs / RPOs in the industry
- Complete automation and orchestration of recovery with no manual steps
- Simplicity with failover and failback in only 3 clicks

Ransomware Attacks

Avoid Ransomware Cost, Data Loss and Downtime

- Point-in-time recovery for seamless “roll-back” to moments before attack
- Journal provides rewind capability in ~5 second increments – for up to 30 days
- Granular file-level recovery from logical failures – never copy a corrupted file again

Complete Data Protection

One Platform for All Your Data Protection Needs

- Long-term retention and file-level recovery to meet data retention policies & compliance
- Automated testing to ensure recoverability with no impact to production
- Reports for full compliance – consistent with regulations like HIPAA, PCI, GDPR

Infrastructure Modernization

Faster Time to Business Value of New Technology

- Software-only platform removes the complexity and risk of legacy hardware
- Multi-hypervisor support and storage agnostic so you can use any storage or hypervisor
- Move to any cloud; Azure, IBM Cloud, AWS and Zerto-enabled Cloud Service Providers

Consolidations & Migrations

Reduce Time and Risk of Data Center Consolidations

- Low RPO so no risk of data loss – save time & money
- Broad hypervisor version support and heterogeneous storage support to solve for infrastructure complexity
- Complete application consistency with Virtual Protection Groups for simple application moves

Testing & DevOps

Innovate IT Processes with Minimal Impact

- Clone features for extended testing or development
- Create isolated environment for test and dev and gain confidence to do upgrades and installs
- Test patch on a recent database (not copy bubble environment) for real-world testing

Cloud Integration & Migration

Migrate to Cloud Regardless of Underlying Technology

- Consistency groupings make moving entire workloads from on-premises into cloud easy and eliminates risk
- Bi-directional replication of data and applications – move freely across and between clouds or hypervisors
- In-memory change block tracking simplifies migrations

Multi-Cloud & Hybrid Cloud

Cloud Agility to Future-proof Your IT Strategy

- Core to the cloud service offerings of Azure, IBM Cloud, AWS and >350 Zerto-enabled Cloud Service Providers
- Any-to-any replication between clouds and hypervisors – select the right cloud at the right time for your cloud strategy
- Bi-directional replication – easily get in and out of clouds

Analytics Across Clouds

Full Visibility to Manage a Multi-Cloud, Multi Site Environment

- Zerto Analytics provides visibility of infrastructure across all datacenters and clouds with easy-to-use dashboards
- Real-time visualization of datacenter health to proactively move and recover data
- Easy to manage, test and scale, even from a mobile phone for confidence that SLAs are met
